

# TAS NETAcquirer

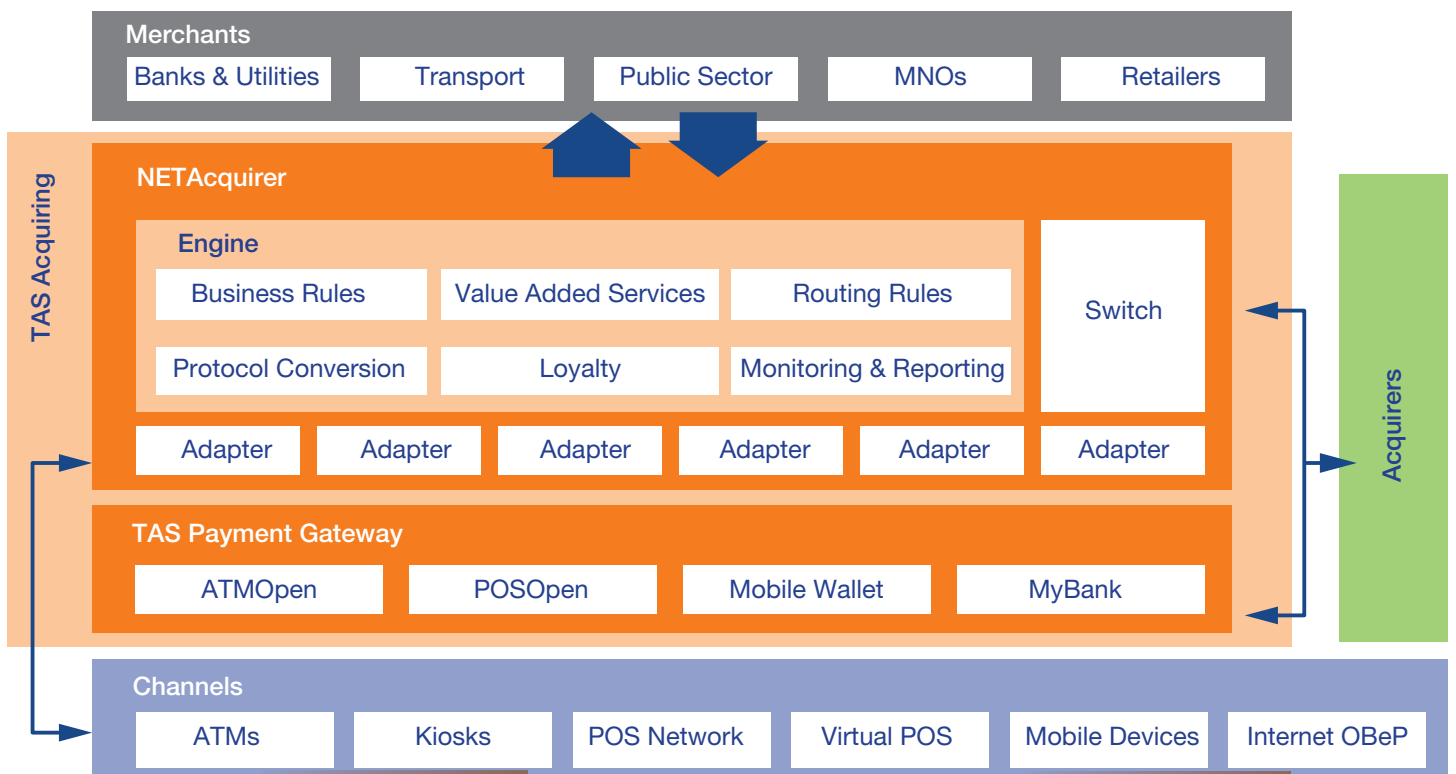

New business  
transaction acquiring

More and more business sectors (merchants) require access to new payments channels and expect to be able to offer their customers innovative payment systems and services in a timely manner. Thus, financial institutions must integrate the new payments channels in their existing Acquiring environments and provide these solutions to the merchants. NETAcquirer is the TAS solution supporting merchants in adopting new payment channels and building new value propositions while optimising transaction management. It manages transactions originating from many channels: ATMs, kiosks, physical and virtual POS terminals, Mobile, web, etc. Natively engineered for EMV, it can capture transactions from different sources, not only EMV, but also magnetic stripe cards, flat-memory cards, Mobile SIM cards.

## → TAS EMV Acquiring Platform

A complete proposition including a Payment Gateway that enables acquirers to manage traditional channels (ATM and POS) along with Mobile remote and proximity payments (e.g. QR and NFC) and internet OBeP.
